Foreign vs. Domestic Methamphetamine

U.S. Methamphetamine Problem

 - Small Capacity Production Labs (SCPLs) (based in the U.S.)

United States Meth Lab Incidents

Hawaii Meth Lab Incidents

What
happened in
2006 & 2007

- Combat Methamphetamine Epidemic Act of 2005(CMEA)

Domestic Meth

- Today's Home-making Methamphetamine
 - Easier to make and more potent than ever before
 - Common chemicals purchased over the counter
 - Takes as little as one package of precursor
 - Today's meth made in as little as 15 minutes
 - earlier methods took 20+ hours
 - Today's labs are the most dangerous with regards to fires and explosions
 - Accounts for 98% of all reported clandestine labs

*Why do we have the
CMEA?*

What is the purpose of the CMEA?

To limit the domestic manufacture of methamphetamine by placing restrictions on the sale of Pseudoephedrine, ephedrine and phenylpropanolamine at retail outlets.

Time To Gather

What is a Smurf?

A smurf is someone who buys small quantities of ingredients (e.g., PSE, ice packs, lithium, matches, iodine), from several different locations, in order to manufacture, or more likely, assist in the manufacture of methamphetamine.
